

A simple basal-bolus insulin delivery device to help control blood glucose in adults requiring insulin

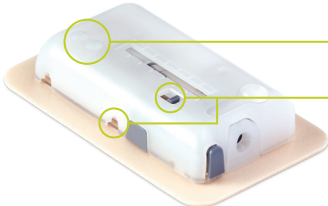

V-Go[®] Device Design and Packaging Update

There is NO change in how V-Go works or how it is used.

The new design allows for a future product enhancement.

|--|--|--|---|

Dispense each as one (1) kit. Do not break apart. Each kit contains 30 single-use V-Go devices and one EZ Fill filling accessory.

Processing Copay Card:

Valid for Commercially Insured (OCC-8) and Insured Not Covered (OCC-3) Patients ONLY.

1. Process as a split bill (Coordination of Benefits claim/COB).
2. Use patient's Insurance for PRIMARY claim. If not covered, bypass rejection to process secondary claim.
3. Use copay card for SECONDARY claim using BIN: 610020.

For copay card processing questions call 1-855-236-2128.

Insulin Dispensing Requirement *per FDA Labeling:*

V-Go 20: 2x10ml per 30-day supply

V-Go 30: 3x10ml per 30-day supply

V-Go 40: 3x10ml per 30-day supply

Confirm Your Patient Received *Two* Prescriptions:

V-Go device Rx **&** Rapid-acting insulin Rx

Important Risk Information

If regular adjustments or modifications to the basal rate of insulin are required in a 24-hour period, or if the amount of insulin used at meals requires adjustments of less than 2-Unit increments, use of V-Go Disposable Insulin Delivery Device may result in hypoglycemia. The following conditions may occur during insulin therapy with V-Go: hypoglycemia (low blood glucose) or hyperglycemia (high blood glucose). Other adverse reactions associated with V-Go use include skin irritation from the adhesive pad or infections at the infusion site. V-Go should be removed before any magnetic resonance imaging (MRI) testing.
